# Gateway Area Water Management Council Project Prioritization Plan

### Table of Contents

Prioritization Plan	1
Appendix A: Tier I Ranking Sheet	4
Appendix B: Tier II Ranking Sheet	6
Appendix C: Tier I Sponsorship and Boost Information Table	8

#### Introduction:

The purpose of this document is to provide a plan to the Kentucky Infrastructure Authority (KIA) for the sponsorship and prioritization of water and wastewater projects pursuant to KRS 151.607, the annual review and prioritization of planning councils' plans. KRS 151.607 states, "After July 1, 2001, and annually thereafter, each area development district shall review and prioritize the planning councils' plans for underserved and unserved areas within the 2020 water management area for that district. The review and prioritization shall be conducted with the assistance and input of the authority and the water management councils for the counties or multicounty areas within a 2020 water management area. These prioritization plans shall be submitted to the authority for review and approval. The authority may suggest changes necessary for the purpose of qualifying for financial assistance from the 2020 water service account of the Kentucky Infrastructure Authority."

Gateway Area Development District (ADD) has developed a data-driven, objective, and collaborative approach to determine the region's water and wastewater funding priorities. The methodology was developed based on input gathered from a Gateway Area Water Management Council sub-committee and will be approved by the full Council. The ranking methodology uses quantitative data to compare the projects under the following categories: Project Impact and Project Status. The methodology also includes collaboration with utility and local leadership throughout the process to help shape regional funding priorities. Through this collaboration, projects will be selected for prioritization via sponsorship into two tiers, Tier I and Tier II.

#### **Project Prioritization:**

#### Tier I Project Sponsorship Process

Each utility receives two (2) Tier I project sponsorships. Projects sponsored in Tier I will be ranked and awarded points based on the sub-categories that comprise the Project Impact and Project Status categories. Utilities having both water and wastewater infrastructure, receive two (2) project sponsorships per regulatory framework (water and wastewater), regardless of the number of systems. A utility's sponsorship may be applied to any like regulatory framework (water or wastewater project) in the region or can go unused.

Utilities notify Gateway ADD staff of the project(s) they wish to sponsor for Tier I prioritization by a date to be determined annually in advance of each utility's respective Planning Unit Ranking Meeting. Gateway ADD staff will review Tier I projects and award points based on the Project Impact and Project Status criteria. A project's Cost per Connection will be the tie breaker. Please refer to Appendix A, Tier I Ranking Sheet, for additional information on the ranking criteria.

#### Tier I Project Boost Process

To assign additional points during the prioritization process to adjust Planning Unit and Regional priorities, each Planning Unit (county) receives one (1) Water and one (1) Wastewater Turbo-Boost, worth 10 points each, and a defined number of Water and Wastewater Boost(s), based on the

Sponsorships By	Boosts
Planning Unit	5 Points
1 - 4	1
5 - 8	2
9 - 12	3

Table 01 – Number of Boosts allotted based on the number of Sponsorships per Planning Unit.

number of Sponsorships each Planning Unit receives, worth five (5) points each. A maximum amount of 10 Boost points per project is allowable (one (1) Turbo-Boost or up to two (2) Boosts).

	V	Vater Boosts		Wastewater Boosts			
Planning Unit	Sponsorships	Turbo-Boosts 10 Points	Boosts 5 Points	Sponsorships	Turbo-Boosts 10 points	Boosts 5 Points	
Bath	6	1	2	6	1	2	
Menifee	4	1	1	4	1	1	
Montgomery	12	1	3	4	1	1	
Morgan	4	1	1	2	1	1	
Rowan	4	1	1	2	1	1	

Table 02 - Turbo-Boosts and Boosts breakdown by Planning Unit for Water and Wastewater.

Boosts are applied to projects at the Planning Unit Ranking Meetings. Projects identified and approved by the Water Management Council members, for each respective Planning Unit, as having the greatest need and impact on both a local and regional level receive Boosts. In the event a utility, or designee, is not present during the Planning Unit Ranking Meeting where Boosts are assigned, that utility's project(s) will not be eligible for a Boost(s).

#### Tier II Project Sponsorship Process

Each utility will have the option to submit additional projects that were not sponsored in Tier I to the Tier II ranking process. Tier II projects are scored by the utility's Water Management Council representative at the Planning Unit Ranking Meeting using the Regional Needs Assessment and Scope of Impact (New Connections, Underserved, and Other) ranking guides and a Cost per Connection tie breaker. Tier II projects are not eligible for Boosts. Please refer to Appendix B, Tier II Ranking Sheet, for additional information on the ranking criteria.

#### Planning Unit Ranking Meetings

Planning Unit Ranking meetings are comprised of Water Management Council members, or designee, for each respective Planning Unit, and will occur at the County Judge-Executive's office. The Water Management Council Coordinator facilitates the Planning

Unit Ranking Meetings. The purpose of these meetings is to discuss the needs and goals of the Planning Unit, review Tier I Sponsorships, assign Boosts to Tier I projects, and prioritize Tier II projects. Robert's Rules of Order shall govern all questions of the parliamentary proceedings of the Planning Unit Ranking Meetings. A quorum of the Planning Unit Ranking Meetings is defined to mean at least two of the Water Management Council members are present for that respective Planning Unit.

### GATEWAY WATER MANAGEMENT COUNCIL TIER I PROJECT RANKING SHEET (150 PTS. MAX)

Project Name:  Project Owner:
