**Flood Study Questionnaire
Beaver Creek Study Project**

Dear Property Owner:

The Menifee County Fiscal Court has selected Integrated Engineering/PRIME AE (IE/PRIME) to perform a flood study along Beaver Creek that your property is located within. In the near future IE/PRIME will have surveyors in and around your property to collect topographic (ground) and structure data that will be important in completing our flood study.

Another important step in this flood study is for us to gain a better understanding of the flooding issues that you may be experiencing. Therefore, we ask that you complete the enclosed questionnaire and either return it to our office (mail it back to us with the enclosed envelope) or via email at the address noted below. Please be very specific with the information; including where flooding occurs, to what level, has water entered your property, has water entered your garage or house, etc. We would also like to point out that a completed questionnaire stating that there are no problems is just as important and valid in solving flooding problems as a survey stating that problems exist. Feel free to contact me at 606-768-3482 or Steve Garland at 859-977-9629 if you have any questions or comments regarding this questionnaire. You can also email Steve Garland at sgarland@primeeng.com if you have questions or would like to submit your completed questionnaires and flooding photos in a digital format.

Please note that a public meeting is planned for January 11th @ 6 pm at the Menifee County High School. This will be an opportunity to meet and discuss your flooding concerns. It would be most helpful to have the questionnaires completed and returned in advance of this meeting to give us a better understanding of the flooding along Beaver Creek. Thank you in advance for your time and cooperation regarding this matter.

Sincerely,

Rick Stiltner
Menifee County Judge Executive

Steve Garland, PE, LSIT
Project Manager
Integrated Engineering/PRIME AE
